

The Executive Desk - Custom GPT Build Files

These files define the Phase 1 read-only Custom GPT setup for The Executive Desk.

Files

- `the-executive-desk-instructions.md` - paste into the GPT Instructions field.
- `the-executive-desk-openapi.yaml` - import or paste into the GPT Actions schema field.

GPT Settings

Name:

The Executive Desk

Description:

A governed executive operations desk for SentinelOS diagnostics, readiness rev

Authentication:

None

Phase 1 Test Prompts

Use these in the GPT Builder Preview panel:

Call `getProxyHealth`.

Call `getProxyStatus`.

Governance Boundary

This Phase 1 schema verifies only:

- GPT to Cloudflare tunnel reachability.
- Cloudflare tunnel to signing proxy reachability.
- Signing proxy health and configuration status.

It does not verify:

- Downstream Sentinel API command execution.
- RBAC.
- OTP.
- Receipt or audit generation.
- Broker ACK readiness.

External live claims remain disallowed until a governed downstream command returns valid evidence.

Tunnel Note

The configured server URL is:

```
https://beans-candles-tamil-dressed.trycloudflare.com
```

This URL works only while the local `cloudflared tunnel --url http://localhost:3001` process is running.
